

# AMERICAN INTERNATIONAL UNIVERSITY-BANGLADESH (AIUB)

Faculty of Science and Technology (FST)
Department of Computer Science (CS)
Undergraduate Program

#### **COURSE PLAN**

Fall 2021-22 SEMESTER

I. Course Code and Title

CSC 2210: Object Oriented Analysis and Design

II. Credit

3 credit hours (3 hours of theory per week)

III. Nature

Core Course for CS, CSE, CSSE, SE, CIS

IV. Prerequisite

CSC 2105: Data Structure

CSC 2107: Introduction to Database

#### V. Vision:

Our vision is to be the preeminent Department of Computer Science through creating recognized professionals who will provide innovative solutions by leveraging contemporary research methods and development techniques of computing that is in line with the national and global context.

#### VI. Mission:

The mission of the Department of Computer Science of AIUB is to educate students in a student-centric dynamic learning environment; to provide advanced facilities for conducting innovative research and development to meet the challenges of the modern era of computing, and to motivate them towards a life-long learning process.

#### VII - Course Description:

- Explain the necessity of formal modelling techniques in system development
- Describe system analysis and design using object-oriented concepts and techniques
- Quote the UML building blocks along with their notations
- Demonstrate the use of object-oriented analysis concept with UML diagrams
- Solve complex engineering problems using UML concepts and tools

#### VIII - Course outcomes (CO) Matrix:

By the end of this course, students should be able to:

| COs* | CO Description  | Level of Domain** |   | РО |   |             |
|------|---|-------------------|---|----|---|-------------|
|      |   | С                 | Р | Α  | S | Assessed*** |
| CO1  | Illustrate the concept of object-oriented analysis through the use of UML diagrams.                                 | 3                 |   |    |   | PO-e-2      |
| CO2  | Design a Complex engineering problem using UML Tools and explain the system using a project report and presentation |                   | 6 |    |   | PO-e-2      |

C: Cognitive; P: Psychomotor; A: Affective; S: Soft-skills (CT: Critical Thinking, TS: Teamwork)

- \* CO assessment method and rubric of COs assessment is provided in Appendix section
- \*\* The numbers under the Level of Domain' columns represent the level of Bloom's Taxonomy each CO corresponds to.
- \*\*\* The numbers under the PO Assessed' column represent the PO (appendix) each CO corresponds to.

### IX – Topics to be covered in Class:

| TODICS                                      | Specific   | Time        | Suggested   | Teaching  | CO      |  |  |  |
|---|--|-------------|---|---|---------|--|--|--|
| TOPICS                                      | Objective(s)   | Frame       | Activities  | Strategy(s)   | mapped  |  |  |  |
| Introduction<br>to Software<br>Modeling     | Explain the outline of the upcoming topics and discuss the necessity of formal modeling techniques in system development.                            | Week 1      | Why we do software modeling will be lectured in summarized form along with necessary explanation of phrases and concepts  | Lecture notes, Explanation of quotations, real life examples, question answer session | CO1     |  |  |  |
| Introduction of UML                         | Name the various UML and its building blocks with their notations.   | Week 1      | The introduction of UML necessary explanation of phrases and concepts.  | Lecture<br>notes,<br>question<br>answer<br>session                                    | CO1     |  |  |  |
| Use Case<br>Diagram<br>Data Flow<br>Diagram | Demonstrate the requirements with the static view of a system.   | Week<br>2-3 | Students will realize the importance of the requirement analysis as the first step of system analysis with the help of the most visual tool Use Case Diagram                                  | Lecture notes, real life case study solutions, question answer session                | CO1,CO2 |  |  |  |
| Class<br>Diagram<br>Object<br>Diagram       | Illustrate the relationships between a set of classes, interfaces and collaborations. Class diagrams demonstrate the static design view of a system. | Week<br>4-5 | The most common artifact of OO design classes will be introduced to the students with all possible relationships explained with notations and examples  | Lecture notes, real life case study solutions, question answer session                | CO1,CO2 |  |  |  |
| Sequence<br>Diagram                         | Illustrate a sequence diagram which is an interaction diagram that emphasizes the time ordering of messages.   | Week 6      | Notations of interaction diagrams would be introduced to the students with its necessity to understand the dynamic view of a system. Both, UML 1.4 and 2.0 specifications will be introduced. | Lecture notes, real life case study solutions, question answer session                | CO1,CO2 |  |  |  |
|   | Midterm Week Week 7  |             |   |   |         |  |  |  |

| Activity<br>Diagram    | Illustrate the activity diagram as a special kind of a state chart diagram that shows the flow from activity to activity within a system                                | Week<br>8-9 | Students will learn<br>the notations of<br>activity diagram<br>along with<br>identifying and<br>drawing the flow of<br>the system from<br>activity to activity<br>within a system | Lecture notes, real life case study solutions, question answer session | CO2 |  |  |
|------------------------|---|-------------|---|--|-----|--|--|
| State chart<br>Diagram | Illustrate that state chart diagram is important in modeling the behavior of an interface, class or collaboration and emphasize the event ordered behavior of an object | Week<br>10  | Students would be able to understand the behavioral aspects of the system by drawing states of the objects using various examples   | Lecture notes, real life case study solutions, question answer session | CO2 |  |  |
| COCOMO & Function      | Illustrate various aspects of IS project estimation using one of the popular  |             | Students will be introduced with theories and formulae of   | YTY  |     |  |  |
| Point                  | methodologies   |             | COCOMO and  | Lecture  |     |  |  |
| (Software              | named COCOMO  | 111         | practice them in  | notes,   |     |  |  |
| Project                | To introduce the  | Week        | exercises. Students   | board work,  |     |  |  |
| Estimation)            | Software measuring  | 11-12       | will study the  | question   |     |  |  |
| OO                     | technique specially   | (2000)      | theories and  | answer   |     |  |  |
| Software               | for Object Oriented   |             | formulae of various   | session  |     |  |  |
| metrics                | Methodology using   | 10          | OO Software   |  |     |  |  |
|                        | various OO software   | 79          | metrics and then  |  |     |  |  |
|                        | metrics   |             | apply them in   |  |     |  |  |
|                        | SAA   | IOI         | exercises   |  |     |  |  |
| Design<br>Patterns     | Model design patterns which capture the essence of a design solution that has been proven to be useful in practice of OO Methodology                                    | Week 13     | Students will be shown the theories and technique of using various design patterns  | Lecture note, examples, code walkthroughs                              |     |  |  |
|                        | F   | inal term   |   |  |     |  |  |
| Week 14                |   |             |   |  |     |  |  |

#### **XI- Course Requirements**

At least 80% class attendance is necessary to sit for the exam. If there is any assignment given to the students, they have to submit it before the deadline decided by the course teacher.

#### XII - Evaluation & Grading System

The following grading system will be strictly followed in this class

**Mid Term Exam:** 

Written Exam: 40% (MCQ + Diagram Drawing)

Quizzes: 20% Assignment: 30%

Attendance & Performance: 10%

**Final Term Exam:** 

Written Exam: 40% (MCQ + Diagram Drawing)

**Quiz: 20%** 

Assignment/Project: 30% Attendance & Performance: 10%

**Semester grade:** 50% midterm + 50% final term

| Letter   | Grade Point | Numerical %             |
|----------|-------------|-------------------------|
| A+       | 4.00        | <u>90-100</u>           |
| А        | <u>3.75</u> | <u>85 - &lt; 90</u>     |
| B+       | <u>3.50</u> | <u>80 - &lt; 85</u>     |
| <u>B</u> | <u>3.25</u> | <u>75 - &lt; 80</u>     |
| C+       | 3.00        | <u>70 - &lt; 75</u>     |
| С        | <u>2.75</u> | <u>65 - &lt; 70</u>     |
| D+       | <u>2.50</u> | <u>60 - &lt; 65</u>     |
| D        | <u>2.25</u> | <u>50 - &lt; 60</u>     |
| F        | 0.00        | <u>&lt; 50</u>          |
| I        |             | <u>Incomplete</u>       |
| W        |             | <u>Withdrawal</u>       |
| UW       |             | Unofficially Withdrawal |

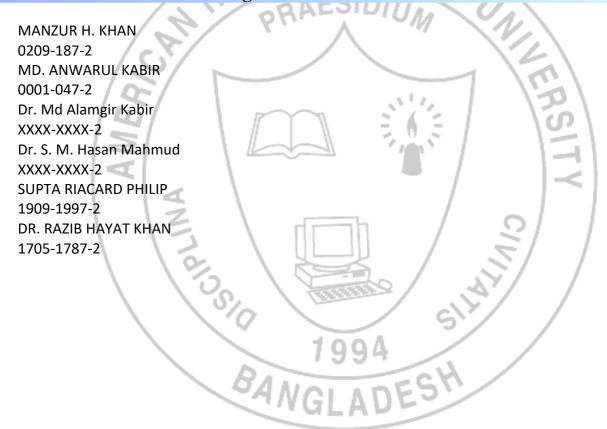

#### XIII - Teaching Methods

Maximum topics will be covered from the textbook. For the rest of the topics, reference books will be followed. Some Class notes will be uploaded on the web. White board will be used for most of the time. For some cases, multimedia projector will be used for the convenience of the students. Students must study up to the last lecture before coming to the class and it is suggested that they should go through the relevant chapter before coming to the class. Just being present in the class is not enough- students must participate in classroom discussions.

#### XIV - Textbook/ References

- 1. The Unified Modeling Language User Guide by Grady Booch, James Rumbaugh, Ivar Jacobson
- 2. UML Weekend Crash Course by Thomas A Pender
- 3. Head first design patterns by Eric Freeman, Elisabeth Freeman, Kathy Sierra, Bert Bates
- 4. Design Patterns- Elements of Reusable Object-Oriented Software by Eric, Gamma, Richard Helm, Ralph Johnson, John Vlissides
- 5. An Integrated Approach to Software Engineering by PankajJalote
- 6. Object Oriented Software Engineering-Ivar Jacobson, Magnus Christerson, Patrik Jonsson, Gunnar Overgaard
- 7. The Unified Modeling Language Reference Manual by Grady Booch, James Rumbaugh, Ivar Jacobson
- 8. Object Oriented System Analysis and Design, Second Edition by Grady Booch

#### **APPENDIX**

|     | Table 1: Knowledge Profile (WK / K)         |  |  |  |  |  |
|-----|---|--|--|--|--|--|
|     | Curriculum                                  |  |  |  |  |  |
| Ind | licator                                     | Attribute  |  |  |  |  |
| K1  | Theory based natural science                | A systematic, theory-based understanding of the natural sciences applicable to the discipline  |  |  |  |  |
| К2  | Conceptual based mathematics                | Conceptually based mathematics, numerical analysis, statistics and the formal aspects of computer and information science to support analysis and modeling applicable to the discipline  |  |  |  |  |
| К3  | Theory based engineering fundamentals       | A systematic, theory-based formulation of engineering fundamentals required in the engineering discipline  |  |  |  |  |
| К4  | Forefront specialist knowledge for practice | Engineering specialist knowledge that provides theoretical frameworks and bodies of knowledge for the accepted practice areas in the engineering discipline; much is at the forefront of the discipline  |  |  |  |  |
| К5  | Engineering Design                          | Knowledge that supports engineering design in a practice area  |  |  |  |  |
| К6  | Engineering Practice<br>(Technology)        | Knowledge of engineering practice (technology) in the practice areas in the engineering discipline   |  |  |  |  |
| К7  | Comprehension of engineering in society     | Comprehension of the role of engineering in society and identified issues in engineering practice in the discipline: ethics and the engineer's professional responsibility to public safety; the impacts of engineering activity; economic, social, cultural, environmental and sustainability |  |  |  |  |
| К8  | Research Literature                         | Engagement with selected knowledge in the research literature of the discipline  |  |  |  |  |
|     | A A A A                                     |  |  |  |  |  |

|           | Table 2: Range of Co  | omplex Engineering Problem Solving (WP / P)   |  |  |  |  |  |  |
|-----------|---|---|--|--|--|--|--|--|
| ı         | Complex Engineering Problems have characteristic P1 and some or all of P2 to P7 |   |  |  |  |  |  |  |
| Indicator | Title   | Description   |  |  |  |  |  |  |
| P1        | Depth of knowledge required   | Cannot be resolved without in-depth engineering knowledge at the level of one or more of K3, K4, K5, K6 or K8 which allows a fundamentals-based, first principles analytical approach |  |  |  |  |  |  |
| P2        | Range of conflicting requirements   | Involve wide-ranging or conflicting technical, engineering and other issues   |  |  |  |  |  |  |
| Р3        | Depth of analysis required  | Have no obvious solution and require abstract thinking, originality in analysis to formulate suitable models  |  |  |  |  |  |  |
| P4        | Familiarity of issues   | Involve infrequently encountered issues   |  |  |  |  |  |  |
| P5        | Extent of applicable codes  | Are outside problems encompassed by standards and codes of practice for professional engineering  |  |  |  |  |  |  |
| Р6        | Extent of stakeholder involvement and conflicting requirements                  | Involve diverse groups of stakeholders with widely varying needs  |  |  |  |  |  |  |
| Р7        | Interdependence   | Are high level problems including many component parts or subproblems   |  |  |  |  |  |  |

|           | Table 3: Range of Complex Engineering Activities (A)   |   |  |  |  |  |
|-----------|--|---|--|--|--|--|
| Comple    | Complex activities means (engineering) activities or projects that have some or all of the following characteristics   |   |  |  |  |  |
| Indicator | ndicator Title Description   |   |  |  |  |  |
| A1        | Range of resources   | Involve the use of diverse resources (and for this purpose resources include people, money, equipment, materials, information and technologies) |  |  |  |  |
| A2        | Level of interaction   | Require resolution of significant problems arising from interactions between wide-ranging or conflicting technical, engineering or other issues |  |  |  |  |
| А3        | Innovation   | Involve creative use of engineering principles and research-based knowledge in novel ways   |  |  |  |  |
| A4        | A4 Consequences for society and the environment Have significant consequences in a range of contexts, characterized by difficulty of prediction and mitigation |   |  |  |  |  |
| A5        | Familiarity  | Can extend beyond previous experiences by applying principles-based approaches  |  |  |  |  |

### Mapping of PO/PLO and K, P, A of this course:

#### PO-e: Modern Tool Usage

Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools, including prediction and modelling, to complex engineering problems, with an understanding of the limitations. (K6).

| PO<br>Indicator<br>ID | PO Indicators Definition (As per the requirement of WKs)  | Domain                             | К  | Р             | А             |
|-----------------------|---|------------------------------------|--|---------------|---------------|
| PO-e-2                | Create appropriate techniques, tools, or resources (e.g., prediction & modeling) to solve complex engineering problems considering their limitations. | Psychomotor<br>Level 6<br>(Create) | K6<br>Engineering Practice<br>(Technology) | P1, P4,<br>P7 | A1,<br>A2, A3 |

### **Mapping of CO Assessment Method and Rubric**

The mapping between Course Outcome(s) (COs) and The Selected Assessment method(s) and the mapping between Assessment method(s) and Evaluation Rubric(s) is shown below:

|     | CO                               | Description   | Learning<br>Domain | Assessment<br>Method | Assessment<br>Rubric  |  |  |
|-----|----------------------------------|---|--------------------|----------------------|-----------------------|--|--|
| C   | <b>:</b> 01                      | Illustrate the concept of object-oriented analysis using UML diagrams.  | Cognitive          | Quiz                 | Rubric for<br>Quiz    |  |  |
| C   | <b>CO2</b>                       | Design a Complex engineering problem using UML Tools and explain the system using a project report and presentation | Psychomotor        | Project              | Rubric for<br>Project |  |  |
| Rul | Rubric for Quiz Assessment (CO1) |   |                    |                      |                       |  |  |

|   | / _ \ _ /  |  |  |  |          |
|---|--|--|--|--|----------|
|   |  | Marks distribution   | n ( Max 3X5 = 15)  |  | Acquired |
| Criteria  | Inadequate   | Satisfactory   | Good   | Excellent  | Marks    |
|   | (1-2)  | (3)  | (4)  | (5)  |          |
| Object<br>Oriented<br>Concept                     | Identifies very<br>few of the<br>object-oriented<br>design elements<br>and their         | Identifies some of the object-oriented design elements and their relations | Identifies most of the object-oriented design elements and their relations | Identifies all of<br>the object-<br>oriented design<br>elements and<br>their relations |          |
| \ \   | relations  | \  | /  | $\sim 1$   |          |
| Diagram<br>Standard                               | Lack of design<br>element and in<br>many cases<br>inappropriate<br>notations are<br>used | Appropriate notations are used for some of the design elements             | Appropriate notations are used for most of the design elements             | Appropriate notations are used for all design elements                                 |          |
| Correctness<br>and<br>Efficiency of<br>the Design | In many cases<br>the design is<br>not correct and<br>not efficient                       | The design is mostly correct and in some cases not very efficient          | The design is correct and not efficient in some cases                      | The design is correct and efficient  |          |
|   |  |  |  | Acquired Marks:  |          |
|   |  |  |  | CO Pass/Fail:  |          |

## **Rubric for Assignment Assessment (CO2)**

|                          |   | Marks distribu  | tion ( Max 4X5 = 2  | 20)   | 0                 |
|--------------------------|---|---|---|---|-------------------|
| Criteria                 | Inadequate<br>(1-2)   | Satisfactory<br>(3)   | Good<br>(4)   | Excellent<br>(5)  | Acquired<br>Marks |
| Content<br>Knowledge     | Student does<br>not have<br>grasp the idea<br>of the subject<br>matter and<br>cannot<br>explain the<br>proposed<br>solution | Student is<br>uncomfortable<br>with project<br>idea and is able<br>to explain only<br>basic<br>information                            | Student is at ease with project content but fails to elaborate with more details  | Student<br>demonstrates full<br>project knowledge<br>with the<br>explanations and<br>required elaboration   |                   |
| Diagram<br>Standard      | The diagram covers very few of the desire features mentioned in specification and their relations                           | The diagram covers some of the desire features mentioned in specification and their relations   | The diagram covers most of the desire features mentioned in specification and their relations   | The diagram covers<br>all the desire<br>features mentioned<br>in specification and<br>their relations and<br>provides well<br>understanding of the<br>Tool functionality                                |                   |
| Report<br>Organization   | Inappropriat e content of several sections of report  | Some content placed incorrectly in report   | Content<br>appropriate to<br>all section of<br>report   | Content organization enhances readability and/or understandability of report  |                   |
| Presentation<br>Delivery | Holds no eye contact with audience, as entire report is read from notes, speaks in low volume and monotonous tone.          | Displays minimal eye contact with audience, while reading mostly from the notes, speaks in uneven volume with little or no inflection | Consistent use of direct eye contact with audience, but still returns to notes, speaks with satisfactory variation of volume and inflection | Holds attention of entire audience with the use of direct eye contact, seldom looking at notes, speaks with fluctuation in volume and inflection to maintain audience interest and emphasize key points |                   |
| Tool Use                 | The use of UML tool is inappropriat e and lack of efficiency in the design  | The use of UML tool is mostly appropriate but lack of efficiency in the design  | The use of UML tool is appropriate but lack of efficiency in the design   | Provides a great<br>understanding of<br>the Tool<br>functionality   |                   |
|                          |   |   |   | Acquired Marks:   |                   |
|                          |   |   |   | CO Pass/Fail:   |                   |
